

TECHNICAL DESCRIPTION

OF THE "API-XML" MODULE
Version 2.7.2 (19.01.2024)

1. Basic Information

The service is designed for searching and booking hotels, canceling orders, obtaining detailed information about hotels and services provided, and retrieving order information.

The service operates in XML (eXtensible Markup Language) format.

To work with the service, the following data is required:

- Organization ID (BuyerId)
- User ID (UserId)
- User password (Password)

Access credentials are provided by "A&A" Business Travel Services Holding and are required for each request.

2. Connecting to API-XML2

All requests to the service are sent via HTTP POST protocol to the address:
<https://go-api.aanda.ru/>

If the input parameter `Language` is not specified, the gateway defaults to Russian.

A console is available at http://go-api.aanda.ru/console_, which allows executing requests in UTF-8 encoding and receiving responses.

Two output languages are available:

- Russian (`Language="ru"`)
 - English (`Language="en"`)
-

3. General Table of Input Parameters

Parameter	Description	Example (Format)
Accommodation Id	Unique room code	-
AdditionalInfo	Additional order information	Non-smoking floor
Allotment Code	Number of rooms available for booking	-
ArrivalDate	Check-in date	05.09.2017
ArrivalTime	Check-in time	14:00
ArrivalDateFrom	Start of check-in date range	06.08.2017
ArrivalDateTo	End of check-in date range	07.08.2017
City / City Code	City code	From 0
CompanyID	Company code	COM
Country / Country Code	Country code	From 0
Currency / Currency Code	Currency code	From 0

DepartureDate	Check-out date	11.09.2017
DepartureTime	Check-out time	12:00
DepartureDateFrom	Start of check-out date range	09.08.2017
DepartureDateTo	End of check-out date range	10.08.2017
FreeSaleOnly	Parameter for filtering hotels with quotas	1 or 2
Hotel Code	Hotel code	From 0
Id / Order id	Order number	2146993
IsMultiRate	Output format	1, 0, or omit
Language	Output language	Ru or En
Lat	Hotel latitude	40.177608
Lng	Hotel longitude	44.512592
Limit	Number of orders to display	From 0

ManagerName	Manager name	Orlov Dmitry
ManagerEmail	Manager email	orlovdmitry@gmail.com
Meal Code	Need for paid meals	0, 1, or 2
Message / MessageInfo	Order message	Hello!
Mode	Filter orders from XML only	XML
NumberOfGuests	Number of guests	From 0
NumberOfRooms	Number of rooms	From 0
Password	Password	p2vgx1f1
Person LastName	Guest last name	Ivanov or Иванов
Person FirstName	Guest first name	Ivan or Иван
PhoneNumber	Guest phone number	+7(499)123-45-67
PriceFrom	Minimum search price	From 0
PriceTo	Maximum search price	∞

ProductCode	Hotel code	From 0
Radius	Search radius	From 0
ReferenceNumber	Order number from the client's internal system	∞
RegistrationDateFrom	Start of order creation date range	06.08.2017
RegistrationDateTo	End of order creation date range	08.08.2017
RateID	Rate ID in AandA system	From 1 to 168
ToBeCancelled Code	Used for order cancellation or changes	From 0 to 1
ToBeChanged Code	Used for order cancellation or changes	From 0 to 1
UserId	User ID	company
WhereToPay / WhereToPay code	Payment option	3 - Non-cash payment, 2 - Cash payment at the hotel, 4 - Combined rates for non-cash and cash payments.

4. Recommended Integration Scheme for API PANDA

1. Directory Matching:
 - Country directory (CountryListRequest)
 - City directory (CityListRequest)
 - Hotel directory (HotelListRequest)
 - Meal types and categories (MealTypeRequest, MealCategoryRequest)
 - Room and hotel amenities (HotelAmenitiesRequest, RoomAmenitiesRequest)
 - Hotel types and ratings (HotelTypeRequest, HotelStarsRequest)
 - Order statuses (ClientStatusRequest)

Perform this procedure every 3 months.
2. Loading Detailed Hotel Information:
 - Use HotelDescriptionRequest for matched hotels.

Perform this procedure every 3 months.
3. Search Setup:
 - Search hotels by city or coordinates, check-in/check-out dates, and price range (HotelSearchRequest).
 - Search hotels with pricing for a period (HotelPricingRequest).
4. Order Creation Testing:
 - Create an order (OrderMultiRequest returns the order number and status).
5. Order Information Retrieval:
 - Retrieve order details (OrderInfoRequest).

For online/offline orders, request immediately after creation to check the status. For offline orders, check every 5-10 minutes for the first hour, then 1-2 times per hour until the desired status is received.

Note: Before creating an order (OrderRequest or OrderRequestMulti), verify the price using HotelPricing. Prices may change between search and booking.

5. API – XML2 Methods

- CountryListRequest: Returns a list of available countries with codes.
 - CityListRequest: Returns a list of cities for a selected country with coordinates.
 - HotelListRequest: Returns a list of hotels for a selected city.
 - HotelSearchRequest: Advanced hotel search with pricing, availability, cancellation penalties, and agency commission.
 - CurrencyListRequest: Returns a list of valid currencies.
 - RateListRequest: Returns all available rates.
 - MealTypeRequest: Returns meal options.
 - ServiceTypeRequest: Returns service types.
 - MealCategoryRequest: Returns meal categories.
 - HotelDescriptionRequest: Returns detailed hotel information.
 - HotelPricingRequest: Returns hotel prices for specified parameters.
 - OrderRequest: Creates, modifies, or cancels an order.
 - OrderInfoRequest: Returns detailed order information.
 - OrderListRequest: Returns a list of orders.
 - OrderMessagesRequest: Returns order messages.
 - SendOrderMessageRequest: Sends a message to an order.
 - HotelTypeRequest: Returns hotel types.
 - HotelStarsRequest: Returns hotel ratings.
 - ClientStatusRequest: Returns order statuses.
 - HotelAmenitiesRequest: Returns hotel amenities.
 - RoomAmenitiesRequest: Returns room amenities.
 - CityTypeRequest: Returns city types (settlements).
-

5.1. CountryListRequest

Returns a list of available countries with codes, names, and the number of active cities.

Input Parameters:

Parameter	Description	Notes
CompanyId	Company code	Required
UserId	User code	Required
Password	Password	Required

Output Attributes:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
Country	Country code	Russia: 9
Name	Country name	Russia
Cities	Number of active cities	From 0

5.2. CityListRequest

Returns a list of cities for a selected country with coordinates.

Input Parameters:

Parameter	Description	Notes
CompanyID	Company code	Required
UserId	User code	Required
Password	Password	Required
Country Code	Country code from CountryListRequest	Required

Output Elements:

Element	Parent Element	Description
CityList	-	Main element
Success	CityList	Indicates successful request
Country	CityList	Country information

City	Country	City information
Position	City	City coordinates

Attributes:

Attribute	Description	Example Values
RequestDurationS	Request execution time	0.0016119480133057
Code (Country)	Country code	Armenia: 13
Name (Country)	Country name	Russia
Code (City)	City code	Yerevan: 219
Name (City)	City name	Yerevan
Type	Settlement type ID	Numeric value
TypeName	Settlement type name	Village
Region	Region name	Moscow Oblast
Hotels	Number of hotels in the city	From 0

Position Attributes:

Attribute	Description	Example Values
Latitude	City latitude	40.177608
Longitude	City longitude	44.512592

5.3. HotelListRequest

Returns a list of hotels for a selected city.

Input Parameters:

Parameter	Description	Notes
CompanyID	Company code	Required
UserId	User code	Required
Password	Password	Required
CityCode	City code from CountryListRequest	Required

Output Elements:

Element	Parent Element	Description
HotelList	-	Main element
Success	HotelList	Indicates successful request
Country	HotelList	Country information
City	Country	City information

Position	City	City coordinates
Hotel	City	Hotel information
Position	Hotel	Hotel coordinates
Rating	Hotel	Hotel type
Stars	Hotel	Hotel rating
Certificate	Hotel	Certificate information
FreeSale	Hotel	Free-sale availability
HotelAmenity	HotelAmenities	Hotel amenities

Hotel Attributes:

Attribute	Description	Example Values
Code	Hotel code	From 1
Vat	VAT status	1 (with VAT), 0 (without VAT)
Name	Hotel name	9 Sovetskaya
Address	Hotel address	Russia, St. Petersburg, 9 Sovetskaya St., 5
Description	Hotel description	Text description
Url	Photo link	https://images.aanda.ru/photos/467/81388.jpg

Position Attributes (Hotel):

Attribute	Description	Example Values
Latitude	Hotel latitude	46.354889
Longitude	Hotel longitude	48.052719

Rating Attributes:

Attribute	Description	Example Values
Code	Hotel type code	4 to 14 (see HotelTypeRequest)
Name	Hotel type name	See HotelTypeRequest

Stars Attributes:

Attribute	Description	Example Values
Code	Rating code	1 to 7
Name	Rating name	"5 stars"

Certificate Attributes:

Attribute	Description	Example Values
exists	Certificate status	0 (no), 1 (yes)
expire	Expiry date	"2021-08-01"
stars	Certificate rating	"2"

FreeSale Attributes:

Attribute	Description	Example Values
Code	Free-sale code	See HotelSearch
Name	Free-sale name	See HotelSearch

HotelAmenity Attributes:

Attribute	Description	Example Values
Code	Amenity code	See HotelAmenitiesRequest
Name	Amenity name	See HotelAmenitiesRequest

5.4. HotelSearchRequest

Advanced hotel search with pricing, availability, cancellation penalties, and agency commission.

Input Parameters:

Parameter	Description	Notes
BuyerId	Company code	Required
UserId	User code	Required
Password	Password	Required
Language	Output language	Optional: "ru" (Russian), "en" (English)
City	City code from CountryListRequest	Required
Hotels	Hotel codes from HotelListRequest	Optional (use only one: City or Hotels)
Lat	Latitude	Optional
Lng	Longitude	Optional
Radius	Search radius (km)	Optional

ArrivalDate	Check-in date (dd.mm.yy)	Required
ArrivalTime	Check-in time (hh:mm)	Optional
DepartureDate	Check-out date (dd.mm.yy)	Required
DepartureTime	Check-out time (hh:mm)	Optional
PriceFrom	Minimum price	Optional
PriceTo	Maximum price	Optional
NumberOfGuests	Number of guests	Required
FreeSaleOnly	Filter hotels with quotas	Optional: 1 (with quotas), 2 (all)
MinQuotas	Minimum available rooms	Optional (e.g., "3" for ≥ 3 rooms)
Vat	VAT filter	Optional: 1 (with VAT), 0 (without)

Output Elements:

Element	Parent Element	Description
HotelSearchResponse	-	Main element
Success	HotelSearchResponse	Indicates successful request
AvailableHotelsList	HotelSearchResponse	Found hotels
Hotel	AvailableHotelsList	Hotel details
City	Hotel	City information
Position	City	City coordinates
Country	Hotel	Country information
Position	Hotel	Hotel coordinates
Rating	Hotel	Hotel type
Stars	Hotel	Hotel rating
Certificate	Hotel	Certificate details

RoomAmenity	Code/Name	Room amenities
HotelAmenity	Code/Name	Hotel amenities
HotelOfferList	Hotel	Available booking options
HotelOfferDetail	HotelOfferList	Room category, prices, and conditions
Meals	HotelOfferDetail	Meal options
Meal	Meals	Meal details
MealType	Meals	Meal type
MealCategory	Meals	Meal category
IncludedInPrice	Meal	Indicates if meal is included
PricePeriods	HotelOfferDetail	Price periods
Period	PricePeriods	Price for a specific period
Availability	HotelOfferDetail	Room availability

Allotment	Availability	Available rooms
WhereToPay	HotelOfferList	Payment options
News	NewsList	Hotel news (e.g., no hot water)

HotelSearchResponse Attributes:

Attribute	Description	Example Values
Language	Output language	"ru"
ArrivalDate	Check-in date	15.12.2017
DepartureDate	Check-out date	15.12.2017
NumberOfGuests	Number of guests	"1"
RequestDurationS	Request execution time	"0.38234305381775"

Hotel Attributes:

Attribute	Description	Example Values
Code	Hotel code	From 0
Name	Hotel name	From HotelList
Address	Hotel address	Russia, Moscow, Khomovnichesky Val St., 34
Url	Photo link	https://images.aanda.ru/photos/467/81388.jpg
Vat	VAT status	1 (with VAT), 0 (without)
VAT0	Zero VAT status	1 (yes), 0 (no)
AdditionalVATIncluded	Additional VAT	1 (yes), 0 (no)
CheckInTime	Check-in time	14:00
CheckOutTime	Check-out time	12:00
Timezone	Timezone	UTC+3

City Attributes:

Attribute	Description	Example Values
Code	City code	Moscow: 1
Name	City name	Moscow
Type	Settlement type ID	Numeric value
TypeName	Settlement type	Village

Country Attributes:

Attribute	Description	Example Values
Code	Country code	Russia: 9
Name	Country name	Russia

Position Attributes (Hotel):

Attribute	Description	Example Values
Latitude	Hotel latitude	46.354889
Longitude	Hotel longitude	48.052719

Rating Attributes:

Attribute	Description	Example Values
Code	Hotel type code	4 to 14
Name	Hotel type name	See HotelTypeRequest

Stars Attributes:

Attribute	Description	Example Values
Code	Rating code	1 to 7
Name	Rating name	"5 stars"

Certificate Attributes:

Attribute	Description	Example Values
exists	Certificate status	0 (no), 1 (yes)
expire	Expiry date	"2021-08-01"
stars	Certificate rating	"2"

HotelOfferDetail Attributes:

Attribute	Description	Example Values
Code	Room category code	From 0
RoomName	Room category name	Text
RateName	Non-refundable rate	"Non-refundable"
RateDescription	Not used	-
NumberOfGuests	Number of guests	1 to 4
TotalPrice	Total price	Based on guest count
Rackrate	Rack rate	Based on guest count
TravelAgencyCommission	Agency commission	From 0
TravelAgencyMealCommission	Meal commission	From 0
PenaltySize	Cancellation penalty	Contract currency
DeadlineDate	Penalty deadline	15.12.2017 11:00

PenaltyInfo	Penalty details	Text
-------------	-----------------	------

Meal Attributes:

Attribute	Description	Example Values
Code	Meal code	From MealTypeRequest
Name	Meal name	"Breakfast"

IncludedInPrice Attributes:

Attribute	Description	Example Values
Code	Inclusion status	1 (included), 2 (not)
Name	Inclusion status	"Yes", "No"

Availability Attributes:

Attribute	Description	Example Values
Code	Availability code	2 (Free-sale), 4 (On request)
Name	Availability name	"Free-sale", "On request"

WhereToPay Attributes:

Attribute	Description	Example Values
Code	Payment option	3 (non-cash)
Name	Payment option	"Non-cash payment"

NewsList Attributes:

Attribute	Description
NewsTitle	News title
NewsBegin	Start date
NewsEnd	End date
NewsInfo	Full text

Coordinate-Based Search:

- Specify **Lat**, **Lng**, and **Radius** (in km) to search hotels near a location.
- If both city code and coordinates are provided, coordinates take priority.
- Default radius: 1 km if not specified.

Hotel Code Search:

- Use **Hotels** parameter (e.g., **Hotels="22,46,1876,12513"**) instead of **City**.
 - Maximum: 1000 hotels per request.
-

5.5. HotelSearchRequest (New Format with Multi-Rate Support)

Input Parameters:

Parameter	Description	Notes
IsMultiRate	New format display	1 (new format), 0 (old format), or omit

Output Changes:

- **Rates** tag under **HotelOfferDetail** includes:
 - **Rate_ID**: Rate ID in AandA system (1 to 168).
 - **RateName**: Rate name (e.g., "Standard").
 - **RateDescription**: Rate details.

Availability Attributes (New Format):

Attribute	Description	Example Values
Code	Availability code	0 (On request), 1 (Free-sale)
Name	Availability name	"On request", "Free-sale"
Rooms	Available rooms	From 0

WhereToPay Attributes (New Format):

Attribute	Description	Example Values
Code	Payment option	2 (cash), 3 (non-cash), 4 (combined)
Name	Payment option	"Cash", "Non-cash"

5.6. CurrencyListRequest

Returns a list of valid currencies.

Input Parameters:

Parameter	Description	Notes
CompanyId	Company code	Required
UserId	User code	Required
Password	Password	Required

Output:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
Code	Currency code	2 (RUR), 3 (USD)
Name	Currency name	"RUR", "USD"

5.7. RateListRequest

Returns all available rates.

Input Parameters: Same as CurrencyListRequest.

Output:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
Rate id	Rate ID	1 to 168
Name	Rate name	"Standard"
Description	Rate description	"Standard breakfast"

5.8. MealTypeRequest

Returns meal types.

Input Parameters:

Parameter	Description	Notes
Language	Output language	Optional: "ru", "en"

Output:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
Type Code	Meal type code	1 to 7
Type Name	Meal type name	"Dinner"

5.9. MealCategoryRequest

Returns meal categories.

Input Parameters: Same as MealTypeRequest.

Output:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
Category Code	Meal category code	1 to 22
Category Name	Meal category name	"Buffet"

5.10. ServiceTypeRequest

Returns service types.

Input Parameters: Same as MealTypeRequest.

Output:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
Type Code	Service type code	1 to 31 (excluding 7, 15, 16)
Type Name	Service type name	"Commission"

5.11. HotelTypeRequest

Returns hotel types.

Input Parameters: Same as MealTypeRequest.

Output:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
Type Code	Hotel type code	4 to 14
Type Name	Hotel type name	"Resort"

5.12. HotelStarsRequest

Returns hotel ratings.

Input Parameters: Same as MealTypeRequest.

Output:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
Stars Code	Rating code	1 to 7
Stars Name	Rating name	"5 stars"

5.13. ClientStatusRequest

Returns order statuses.

Input Parameters: Same as MealTypeRequest.

Output:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
Status Code	Status code	18
Status Name	Status name	"In progress"
Status Explanation	Status details	"A&A employee is processing the order"

5.14. HotelAmenitiesRequest

Returns hotel amenities.

Input Parameters: Same as MealTypeRequest.

Output:

Attribute	Description	Example Values
-----------	-------------	----------------

RequestDurationS	Request execution time	From 0
------------------	------------------------	--------

HotelAmenity Code	Amenity code	2
-------------------	--------------	---

HotelAmenity Name	Amenity name	"Wi-Fi"
-------------------	--------------	---------

5.15. RoomAmenitiesRequest

Returns room amenities.

Input Parameters: Same as MealTypeRequest.

Output:

Attribute	Description	Example Values
RequestDurationS	Request execution time	From 0
RoomAmenity Code	Amenity code	3
RoomAmenity Name	Amenity name	"Air conditioning"

5.16. HotelDescriptionRequest

Returns detailed hotel information.

Input Parameters:

Parameter	Description	Notes
-----------	-------------	-------

Hotel Code	Hotel code from HotelListRequest	Required
------------	----------------------------------	----------

Output:

Element/Attribute	Description	Example Values
HotelDescription Code	Hotel code	From 0
Vat	VAT status	1 (with VAT), 0 (without)
Name	Hotel name	From HotelList
CheckInTime	Check-in time	12:00
CheckOutTime	Check-out time	12:00
Address	Hotel address	Text
Phone	Hotel phone	Text
Description	Hotel description	Text
Image url	Photo link	https://images.aanda.ru/photos/467/81388.jpg

FullAddress Attributes:

Attribute	Description	Example Values
Country	Country name	Text
ZIP	Postal code	Numeric
region	Region name	Text
city	City name	Text
strtype	Street type	"Street", "Avenue"
strname	Street name	Text
proptype	Property type	"House", "Building"
propnumber	Property number	Text

City/Country Attributes: Same as earlier methods.

RoomAmenity/HotelAmenity Attributes: Same as earlier methods.

Conference Room Attributes:

Attribute	Description	Example Values
Code	Conference room code	From 1
Name	Conference room name	Text
Area	Area (m ²)	Numeric
QtyTheater	Theater capacity	Numeric
QtyBanquet	Banquet capacity	Numeric

NewsList Attributes:

Attribute	Description
NewsTitle	News title
NewsBegin	Start date
NewsEnd	End date
NewsInfo	News text

5.17. HotelPricingRequest

Returns hotel prices for specified parameters.

Input Parameters:

Parameter	Description	Notes
Hotel	Hotel code from HotelListRequest	Required
ProductCode	Room code from HotelDescriptionRequest	Required
ArrivalDate	Check-in date (dd.mm.yy)	Required
DepartureDate	Check-out date (dd.mm.yy)	Required
NumberOfGuests	Number of guests	Required

Output:

Element/Attribute	Description	Example Values
HotelPricingResponse Code	Hotel code	From 0
StartDate	Check-in date	15.12.2017
EndDate	Check-out date	16.12.2017
vat	VAT status	1 (with VAT), 0 (without)
VAT0	Zero VAT status	1 (yes), 0 (no)
AdditionalVATIncluded	Additional VAT	1 (yes), 0 (no)
Timezone	Timezone	UTC+3

HotelPricingDetail Attributes:

Attribute	Description	Example Values
Code	Room category code	From 0
RoomName	Room category name	Text
RateID	Rate ID	1 to 168
RateName	Rate name	"Standard"
PricePax	Price per guest	Numeric
PriceRackrate	Rack rate	Numeric
TravelAgencyCommissionPax	Agency commission	Numeric
PenaltySizePax	Cancellation penalty	Numeric
DeadlineDate	Penalty deadline	15.12.2017
DeadlineTime	Penalty time	12:00

Meal Attributes:

Attribute	Description	Example Values
Code	Meal code	From MealTypeRequest
Name	Meal name	"Breakfast"
Price	Meal price	Numeric

Availability Attributes:

Attribute	Description	Example Values
Code	Availability code	0 (On request), 1 (Free-sale)
Name	Availability name	"On request", "Free-sale"
Rooms	Available rooms	Numeric

WhereToPay Attributes:

Payment amount for one day in the period excluding additional paid meals, per person
 ...2Pax - two people, ...3Pax - three people, 4Pax - four people.

In the contract currency.

PricePeriods	priceRoom1Pax		
PricePeriods	priceMeal	Price for additional paid meals	In the contract currency
PricePeriods	days	Number of days in the period	From 1

5.18. HotelPricingRequest

new output format with multi-rate support.

To display the new output, the parameter "IsMultiRate" must be specified in the request. The method returns hotel prices based on the specified parameters.

The method used to retrieve data is RequestName= HotelPricingRequest.

Input parameters:

Parameter	Parameter Description	Note
BuyerId	Company code	Mandatory parameter
UserId	User code	Mandatory parameter
Password	Password	Mandatory parameter
Language	Output language	Optional parameter "ru" – Russian (default) "en" – English
Hotel	Hotel code from HotelListRequest	Mandatory parameter
ProductCode	Hotel room code from HotelDescriptionRequest	Mandatory parameter
Currency	Currency code from CurrencyListRequest	Optional parameter (default "2")
MinQuotas	Parameter filtering output by the minimum available number of quotas (rooms) for the dates specified in the request	Optional parameter. Integer value. Example: MinQuotas = "3" - only offers with at least three available rooms for booking will be shown.

ArrivalDate	Check-in date	Mandatory parameter
DepartureDate	Check-out date	Mandatory parameter
ArrivalTime	Check-in time	Mandatory parameter
DepartureTime	Check-out time	Mandatory parameter
IsMultiRate	Display output in the new format	If the parameter is not specified in the request, the old output will be used. IsMultiRate="0" - old output. IsMultiRate="1" - all response offers in the new output format.

NumberOfGuests	Number of guests	Mandatory parameter
WhereToPay	Payment option	3 - non-cash payment
		2 - cash payment at the hotel
		4 - combined output of non-cash and cash payment tariffs.

Output data:

Tag	Attribute	Attribute Description	Value Options
HotelPricing Response	Code	Hotel code	From 0
HotelPricing Response	Name	Hotel name	From method Hotell.ist
HotelPricing Response	CheckInTime	Check-in time	Format HH:MM, e.g., 12:00
HotelPricing Response	CheckOutTime	Check-out time	Format HH:MM, e.g., 14:00
HotelPricing Response	StartDate	Check-in date	Format DD.MM.YYYY, e.g., 15.12.2017
HotelPricing Response	EndDate	Check-out date	Format DD.MM.YYYY, e.g., 16.12.2017
HotelPricing Response	vat	VAT	1 - hotel works with VAT, 0 - hotel works without VAT
HotelPricing Response	VAT0	Hotel with 0% VAT	1 - hotel with 0% VAT, 0 - hotel without 0% VAT
HotelPricing Response	AdditionalVATIncluded	Indicates if the hotel has additional VAT under the contract	1 - additional VAT under the contract exists, 0 - no additional VAT under the contract

HotelPricing Response	RequestDura tionS	Request execution time	From 0
HotelPricing Response	Timezone	Timezone	Format UTC+hour, e.g., UTC+3

Country Code Country code From method CountryList

Country	Name	Country name	From method CountryList
City	Code	City code	From method CityList
City	Name	City name	From method CityList
City	Type	Settlement type ID	From method CityTypeRequest
City	TypeName	Settlement type name	From method CityTypeRequest
City	Position Latitude	City latitude	46.354889
City	Position Longitude	City longitude	48.052719
Position	Latitude	Hotel latitude	46.349236

Position	Longitude	Hotel longitude	48.036366
AllowEarlierCheckIn	Code	Early check-in possibility	1 - Yes, 2 - No
AllowLateCheckOut	Code	Late check-out possibility	1 - Yes, 2 - No
Certificate	exists	Valid certificate availability	1 - with certificate, 0 - without certificate
Certificate	expire	Certificate expiration date	Example "2020.04.03"
Currency	Code	Currency code	From method CurrencyList
Currency	Name	Currency name	From method CurrencyList
HotelAmenities	Code	Hotel service code	From method HotelAmenities
HotelAmenities	Name	Hotel service name	From method HotelAmenities
RoomAmenity	Code	Room service code	From method RoomAmenities
RoomAmenity	Name	Room service name	From method RoomAmenities

HotelPricingDetail	Code	Room category code	From 0
HotelPricingDetail	RoomName	Room category name	Category name in the selected language
Rates	RateID	Rate ID in AandA system	From 1 to 168

Rates	RateName	Rate name	Example, "Basic"
Rates	RateDescription	Rate description	Example, "Basic buffet breakfast"
Rates	PricePax	Accommodation price	Accommodation price based on the number of guests specified in the search
Rates	PriceRackrate	Rack Rate price	Rack Rate price based on the number of guests specified in the search
Rates	TravelAgencyCommissionPax	Accommodation commission	In the contract currency
Rates	TravelAgencyMealCommissionPax	Meal commission	In the contract currency

Rates	PenaltySizePax	Penalty amount for untimely cancellation, excluding additional paid meals	In the contract currency
Rates	DeadlineDate	Penalty application date	Format DD.MM.YYYY, e.g., 15.12.2017
Rates	DeadlineTime (local hotel time)	Penalty application time	Format HH:MM, e.g., 12:00
Rates	PenaltyInfo	Additional penalty information	Example, "Cancellation without penalty is not possible for non-refundable rates"
Rates	MaxGuests	Maximum number of guests in the room	From 1 to 4
Meal	Code	Code indicating meal availability	Meal Code="0" - Not provided Meal Code="1" - Included in the room price Meal Code="2" - Can be purchased for an additional fee

Meal	TypeName	Meal name	From method MealType, e.g., breakfast, lunch
Meal	TypeCode	Meal type code	From method MealType
Meal	Category Code	Meal category code	From method MealCategory
Meal	Category Name	Meal category name	From method MealCategory, e.g., buffet
Meal	Price	Meal price	Example: Price="100"
Meal	RackRate	Meal RackRate price	Example: Price="90"
PricePeriods	startDate	Start date of the price period	Format YYYY-MM-DD, example 2018-01-19
PricePeriods	endDate	End date of the price period	Format YYYY-MM-DD, example 2018-01-21
PricePeriods	priceRoom	Payment amount for one day in the period excluding additional paid meals	In the contract currency
PricePeriods	priceMeal	Price for additional paid meals	In the contract currency

PricePeriods	days	Number of days in the period	From 1
--------------	------	------------------------------	--------

Availability	Code	Booking possibility under Free-sale strategy	<Availability Code="1" Name="Free sale" Rooms="5" or <Availability Code="0" Name="On request" Rooms=""
Availability	Name	Room availability name	0 - On request 1 - Free sale
Availability	Rooms	Number of quotas	From 0
WhereToPay	Code	Payment condition code	3 - Non-cash payment. 2 - Payment at the hotel. 4 - Combined output of non-cash and cash payment tariffs.
WhereToPay	Name	Payment condition name	Example: Non-cash payment
NewsList	News	Important hotel news (if the tag is absent, no news for this hotel)	No hot water
NewsList	NewsTitle	News title	Hot water outage
NewsList	NewsBegin	News start date	NewsBegin="2020-02-27" NewsEnd="2021-02-01"

NewsList	NewsEnd	News end date

5.19. OrderRequest

Method for creating an order. This method is also used for modifying and canceling orders. The method used to retrieve data is RequestName= OrderRequest.

Input parameters:

Parameter	Parameter Description	Note
BuyerId	Company code	Mandatory parameter
UserId	User code	Mandatory parameter
Password	Password	Mandatory parameter
Id	Order number	Mandatory only for order cancellation or modification
ReferenceNumber	Internal order number from the client's system	Optional parameter, specified if necessary. Can be used later for order search.
ManagerName	Manager name	Optional parameter, specified if necessary
Language	Language (affects room category recording)	Optional parameter, specified if necessary
ManagerEmail	Manager email	Optional parameter, specified if necessary

WhereToPay Code	Payment method	2 - Payment at the hotel 3 - Non-cash payment 4 - Combined output of non-cash and cash payment tariffs.
Accommodati on Id	Unique room code	Optional parameter
ArrivalDate	Hotel check-in date	Mandatory parameter
ArrivalTime	Hotel check-in time	Optional parameter. If not specified, automatically filled with the hotel's standard time. If non-standard check-in time is specified, the service "Early check-in" will be automatically added to the order. The order status will then be 35 (Confirmed) or 65 (Booked).
DepartureDat e	Hotel check-out date	Mandatory parameter

DepartureTi me	Hotel check-out time	Optional parameter. If not specified, automatically filled with the hotel's standard time. If non-standard check-out time is specified, the service "Late check-out" will be automatically added to the order. The order status will then be 35 (Confirmed) or 65 (Booked).
NumberOfRo oms	Number of rooms	Mandatory parameter
NumberOfGu ests	Number of guests	Mandatory parameter

AdditionalInfo	Additional order information	Optional parameter. Text information important for order processing. Example: Please provide a double bed.
MessageInfo	Order message	Optional parameter
ClientsPrice	Additional commission for the order set by the Client	Optional parameter. The client can specify the additional commission they wish to receive for the order. The specified value is added to the total client commission for the order and included in the gross price for the room. Important! • The additional commission does not apply to extra services (Meals, Early Check-in/Late Check-out). • The gross price (Price) for the order will be increased by the value specified in ClientsPrice during booking.

ToBeCancelled Code

Mandatory parameter

Order creation:

```
<ToBeCancelled Code="2" />
```

```
<ToBeChanged Code="1" />
```

Modification request:

```
<ToBeCancelled Code="0" />
```

```
<ToBeChanged Code="1" />
```

Cancellation request:

```
<ToBeCancelled Code="1" />
```

```
<ToBeChanged Code="1" />
```

Attention! Modification or cancellation requests can only be submitted for orders with a client status code of 21 (Awaiting client confirmation), 25 (Refused), 35 (Confirmed), 65 (Booked), or 18 (In progress).

Hotel Code	Hotel code	Mandatory parameter
Rate ID	Rate ID in AandA system	From method RateList From 1 - 168 Mandatory parameter If no value is specified for the parameter, the default order is created for RateID="1">- Basic Rate

Product Code	Room category code	Mandatory parameter
Allotment Code		Not processed
Meal Code	Need to order additional paid meals	Mandatory parameter For ordering meals not included in the price: Meal Code="2". If meals are not included and no meals are to be ordered: Meal Code="0" If no meals: Meal Code="0" If meals are included in the rate: Meal Code="1"
Person LastName	Guest last name	Mandatory parameter Example: Ivanov Important! Full match of LastName and FirstName is not allowed for any accommodation type (Single/Double).
Person FirstName	Guest first name	Mandatory parameter Example: Ivan Important! Full match of LastName and FirstName is not allowed for any accommodation type (Single/Double).
PhoneNumber	Guest phone number	Optional parameter
Contragent	Data about the end buyer	Optional parameter Example: <pre><Contragent Type="LLC" Name="Full Name" ShortName="shortname" INN="7705839398" KPP="772601001" AddressUre="Moscow, Ure Address" AddressFact="Moscow, Fact Address" /></pre>

Tag	Attribute Description	Value Options
Success Id	Order number	Example: 2096367
RequestDurationS	Request execution time	Example: 1.2220470905304

It is worth noting that when creating an order with non-standard times for the hotel (early check-in or late check-out), additional services "Early check-in" and "Late check-out" appear in the order with the check-in/check-out times and their costs.

For non-standard check-in times, the order status will be:

If availability exists for the day before the check-in date, the order status will be Booked (65).
If availability does not exist for the day before the check-in date, the order status will be Request received (11).

For non-standard check-out times, the order status will be:

If availability exists for the day after the check-in date, the order status will be Booked (65).
If availability does not exist for the day after the check-in date, the order status will be Request received (11).

Differentiated commission.

Mechanism for changing the gross rate and commission amount in the API-Panda order.

To change the gross rate in the order via API-Panda by adjusting the commission, it is necessary to submit a modification for the order. In A&A terminology, this service is called "differentiated commission."

Example of an order creation request using the "differentiated commission" service:

```
<OrderRequest BuyerId="*****" UserId="*****" Password="*****"
Language="ru" Id="" ReferenceNumber="">
<Currency Code="2" />
<WhereToPay Code="3" />
<ToBeCancelled Code="1" />
<ToBeChanged Code="2" />
<Hotel Code="hotel code" />
<RoomsList AdditionalInfo=" MessageInfo="">
<Room Id="room code" RateID="rate code" NumberOfGuests="number of guests"
```

```
ArrivalDate="12.12.2022" ArrivalTime="14:00" DepartureDate="13.12.2022"
DepartureTime="12:00" ClientsPrice="200">
<Meal Code="0" />
<Person>
<Person LastName="Ivanov" FirstName="Ivan" />
</Person>
</Room>
</RoomList>
</OrderRequestMulti>
```

When executing the request, an order will be created, and the amount from the parameter ClientsPrice="*****" will be added to your commission for the order. The gross amount will also increase by the ClientsPrice value.

To change the commission amount in a previously created order by adjusting the gross rate, it is necessary to send a modification request to API-PandA.

Example of an order modification request:

```
<OrderRequest BuyerId="*****" UserId="*****" Password="*****"
Language="ru" Id="Order number to modify" ReferenceNumber="">
<Currency Code="2"/>
<WhereToPay Code="3"/>
<ToBeCancelled Code="0"/>
<ToBeChanged Code="1"/>
<Hotel Code="hotel code"/>
<RoomList AdditionalInfo=" MessageInfo="">
<Room Id="room code" RateID="rate code" NumberOfGuests="number of guests"
ArrivalDate="12.12.2022" ArrivalTime="14:00" DepartureDate="13.12.2022"
DepartureTime="12:00" ClientsPrice="400">
<Meal Code="0"/>
<Person>
<Person LastName="Ivanov" FirstName="Ivan"/>
</Person>
</Room>
</RoomList>
```

For example, you initially create an order for a hotel with an accommodation price of 3000 for one day with the parameter "ClientsPrice="200".

Your commission under the contract is, for example, 10 percent.

The total commission for the order will be $(3000 \times 0.1) + 200 = 500$.

At the same time, the accommodation cost will increase by the amount you specified in ClientsPrice.

When sending a request to modify the differentiated commission with ClientsPrice=400, your total commission will change according to the formula $(3000 \times 0.1) + 200 + (400 - 200) = 700$.

At the same time, the accommodation cost for the order will also change by the difference between the initial ClientsPrice value and the last transmitted ClientsPrice value.

After sending the request to modify the differentiated commission amount, the order status will temporarily be 47 (changes received), until the invoice is reissued.

After reissuing, the order status will change to 65 (Booked).

Important!

Commission changes under the "differentiated commission" service are possible only if:

- The order status (status code parameter in the response from the OrderInfoRequest method) is 21 (Awaiting client confirmation), 25 (Refused), 35 (Confirmed), 65 (Booked), or 18 (In progress);
- The check-in date in the order has not yet arrived;
- The original order amount has not been changed, e.g., no early check-in/late check-out services have been added, the room category or hotel has not been changed.

5.20. OrderRequestMulti

Method for creating an order. This method is also used for modifying and canceling orders. To retrieve data, the method RequestName=OrderRequestMulti is used.

Input Parameters:	Parameter Description	Note
Parameter		
BuyerId	Company code	Mandatory parameter
UserId Password	User code Password	Mandatory parameter
Id	Order number	Required only for cancellation or modification of an order
ReferenceNum ber	Internal order number from the customer's system	Optional parameter, specified if necessary. Can be used later for order search.
ManagerName	Manager's name	Optional parameter, specified if necessary
Language	Language (affects the recording of room category)	Optional parameter, specified if necessary
ManagerEmail	Manager's email	Optional parameter, specified if necessary

WhereToPay Code	Payment method	2 - Payment upon check-in at the hotel 3 - Cashless payment 4 - combined issuance of cashless and cash payment tariffs
ArrivalDate	Hotel check-in date	Mandatory parameter
ArrivalTime	Hotel check-in time	Optional parameter. If not specified, it is automatically filled with the hotel's standard time. If a non-standard check-in time is specified, the service "Early check-in" will be automatically added to the order.
DepartureDate	Hotel check-out date	Mandatory parameter
DepartureTime	Hotel check-out time	Optional parameter. If not specified, it is automatically filled with the hotel's standard time. If a non-standard check-out time is specified, the service "Late check-out" will be automatically added to the order.
NumberOfGuests	Number of guests	Mandatory parameter

AdditionalInfo	Additional order information	Optional parameter. Textual information important for order processing is passed. For example, requesting a double bed.
MessageInfo	Order message	Optional parameter
ClientsPrice	Additional commission on the order set by the client	Optional parameter. The client can pass the amount of additional commission they would like to receive for the order. The passed value is added to the client's total commission for the order and included in the gross price for the room. Important: • Does not apply to additional services (Meals, P3/PV) in the order. The gross price (Price) for the order will be increased by the value specified in ClientsPrice during booking.
ToBeCancelled Code		Mandatory parameter. Order creation: <code><ToBeCancelled Code="2"/> <ToBeChanged Code="1"/></code> . Modification request: <code><ToBeCancelled Code="0"/> <ToBeChanged Code="1"/></code> . Cancellation request: <code><ToBeCancelled Code="1"/> <ToBeChanged Code="1"/></code> . Attention! Modification or cancellation requests can only be submitted for orders with a client status code of 21 (Awaiting client confirmation), 25 (Denied), 35 (Confirmed), 65 (Booked), or 18 (In progress).

Hotel Code	Hotel code	Mandatory parameter
Rate ID	Tariff ID in the AandA system	From the RateList method. Range: 1–168. Mandatory parameter. If no value is specified for the parameter, the default order is placed for RateID="1" - Main Tariff.
Product Code	Room category code	Mandatory parameter
Meal Code	Need to order paid meals	Mandatory parameter. To order meals not included in the price: Meal Code="2". If meals are not included in the price and no meals are to be ordered: Meal Code="0". If no meals are available: Meal Code="0". If meals are included in the tariff: Meal Code="1".
Person LastName	Guest's last name	Mandatory parameter. Example: Ivanov. Important! Full matching of LastName and FirstName is not allowed for any type of accommodation (Single/Double).
Person FirstName	Guest's first name	Mandatory parameter. Example: Ivan. Important! Full matching of LastName and FirstName is not allowed for any type of accommodation.
PhoneNumber	Guest's phone number	Optional parameter
Contragent	Data about the end buyer	Optional parameter. Example: <code><Contragent Type="OOO" Name="Full Name" ShortName="shortname" INN="7705839398"/></code> .

Success Id	Order numbers	Example: 2096367
------------	---------------	------------------

RequestDurationS	Request execution time	Example: 1.2220470905304
------------------	------------------------	--------------------------

Status Code	Order status (only for cancellation)	Example: Status code="71" name="Cancelled"
-------------	--------------------------------------	---

It is worth noting that when creating an order with non-standard times for the hotel (early check-in or late check-out), additional services "Early check-in" and "Late check-out" appear in the order, along with their check-in/check-out times and costs.

For non-standard check-in times, the order status will be:

If availability exists for the day preceding the check-in date, the order status will be "Booked (65)".

If no availability exists for the day preceding the check-in date, the order status will be "Request received (11)".

For non-standard check-out times, the order status will be:

If availability exists for the day following the check-in date, the order status will be "Booked (65)".

If no availability exists for the day following the check-in date, the order status will be "Request received (11)".

Adding Data About the End Buyer

When creating or modifying an order, data about the end buyer can be specified. This information is used for preparing accounting closing documents.

List of required fields:

- Ownership form
- Short name of the enterprise
- Full name of the enterprise
- Taxpayer Identification Number (INN)
- Reason Code Registration (KPP)
- Legal address
- Mailing address

Even if some fields match (full and short names or addresses), all must be specified.

In the XML request for creating or modifying an order, data about the end buyer is specified in the `Contragent` tag inside the `AccommodationList` tag.

Differential Commission

Mechanism for changing the gross tariff and commission amount in the API-Panda order.

To change the gross tariff in the order by adjusting the commission via API-Panda, you need to submit a modification request for the order. In A&A terminology, this service is called "differential commission."

Example request for creating an order using the "differential commission" service:

```
<OrderRequest
  BuyerId="*****"
  UserId="*****"
  Password="*****"
  Language="ru"
  Id=""
  ReferenceNumber="">
  <Currency Code="2"/>
  <WhereToPay Code="3"/>
  <ToBeCancelled Code="1"/>
  <ToBeChanged Code="2"/>
  <Hotel Code="hotel code"/>
  <RoomsList AdditionalInfo="_MessageInfo="">
```

```

    <Room Id="room code" RateID="tariff code" NumberOfGuests="number of guests"
      ArrivalDate="12.12.2022" ArrivalTime="14:00" DepartureDate="13.12.2022"
      DepartureTime="12:00" ClientsPrice="200">
      <Meal Code="0" />
      <Persons>
        <Person LastName="Ivanov" FirstName="Ivan" />
      </Persons>
    </Room>
  </RoomsList>
</OrderRequestMulti>

```

When executing the request, an order will be created, and the amount from the parameter `ClientsPrice="*****"` will be added to your commission for the order. The gross amount will also increase by the value of `ClientsPrice`.

To adjust the commission amount in a previously created order by changing the gross tariff, you need to send a modification request to API-Panda.

Example modification request:

```

<OrderRequest
  BuyerId="*****"
  UserId="*****"
  Password="*****"
  Language="ru"
  Id="Order number to modify"
  ReferenceNumber="">
  <Currency Code="2" />
  <WhereToPay Code="3" />
  <ToBeCancelled Code="0" />
  <ToBeChanged Code="1" />
  <Hotel Code="hotel code" />
  <RoomsList AdditionalInfo="MessageInfo="">
    <Room Id="room code" RateID="tariff code" NumberOfGuests="number of guests"
      ArrivalDate="12.12.2022" ArrivalTime="14:00" DepartureDate="13.12.2022"
      DepartureTime="12:00" ClientsPrice="400">
      <Meal Code="0" />

```

```

    <Persons>
        <Person LastName="Ivanov" FirstName="Ivan" />
    </Persons>
</Room>
</RoomsList>
</OrderRequest>

```

For example, if you initially create an order for a hotel with a stay price of 3000, for one night with the parameter `ClientsPrice="200"`, and your contract commission is, for example, 10 percent, the total commission for the order will be:

$$(3000 * 0.1) + 200 = 500.$$

At the same time, the stay cost will increase by the amount passed in `ClientsPrice`.

When sending a request to modify the differential commission with

`ClientsPrice="400"`, your total commission will change according to the formula:

$$(3000 * 0.1) + 200 + (400 - 200) = 700.$$

The order's stay amount will also change by the difference between the initial `ClientsPrice` value and the last passed `ClientsPrice` value.

After sending the request to modify the differential commission amount, the order status will temporarily be 47 (changes received) until the invoice is reissued. After reissuing, the order status will change to 65 (Booked).

Important!

Commission adjustments under the "differential commission" service are possible only if:

- The order status (parameter `status code` in the response to the `OrderInfoRequest` method) is 21 (Awaiting client confirmation), 25 (Denied), 35 (Confirmed), 65 (Booked), or 18 (In progress);
 - The check-in date in the order has not yet arrived;
 - The original order amount has not been changed, e.g., no early check-in/late check-out services have been added, the room category or hotel has not been changed.
-

5.21. OrderInfoRequest

This method returns detailed information about an order. To retrieve data, the method RequestName=OrderInfoRequest is used.

Input Parameters:

Parameter	Parameter Description	Note
BuyerId	Company code	Mandatory parameter
UserId	User code	Mandatory parameter
Password	Password	Mandatory parameter
Language	Output language	Optional parameter. "ru" – Russian (default), "en" – English.
Id	Order number	Mandatory parameter
ReferenceNumber	Internal order number from the customer's system	Optional parameter, specified if necessary. Can be used instead of Id to search for an order by the internal number from the customer's system.

Output Data:

Tag	Attribute	Attribute Description	Possible Values
OrderInfoResponse	Id	Order number	
OrderInfoResponse	ReferenceNumber	Internal order number from the customer's system	
OrderInfoResponse	RegistrationDate	Order creation date and time	
OrderInfoResponse	SiteCode	Unique company code	
OrderInfoResponse	DeadlineDate	Date of penalty sanctions	Format: DD.MM.YYYY, e.g., 15.12.2017
OrderInfoResponse	DeadlineTime (local hotel time)	Time of penalty sanctions	Format: HH:MM, e.g., 12:00
OrderInfoResponse	Price	Order cost	
OrderInfoResponse	TravelAgencyCommission	Order commission	

OrderInfoResponse	Penalty	Actual penalty amount	
OrderInfoResponse	StartDate	Check-in date	Format: DD.MM.YYYY, e.g., 15.12.2017
OrderInfoResponse	EndDate	Check-out date	Format: DD.MM.YYYY, e.g., 16.12.2017

Currency	Code	Currency code	From the CurrencyList method
Currency	Name	Currency name	From the CurrencyList method
WhereToPay	Code	Payment terms	2 - Payment upon check-in at the hotel 3 - Cashless payment 4 - combined issuance of cashless and cash payment tariffs.
WhereToPay	Name	Payment terms	3 - Cashless payment. 2 - Payment upon check-in at the hotel. 4 - combined issuance of cashless and cash payment tariffs.
Status	Code	Order status code	
Status	Name	Order status name	Example: Confirmed, Booked, etc.

ContactPerson	Name	Client's contact person for the order	
ContactPerson	Phone	Phone number of the client's contact person for the order	
ContactPerson	Fax	Fax of the client's contact person for the order	
ContactPerson	Email	Email of the client's contact person for the order	
Accommodation	Id	Categories	From 0
Accommodation	ArrivalDate	Check-in date	Format: DD.MM.YYYY, e.g., 15.12.2017
Accommodation	ArrivalTime	Hotel check-in time	Format: HH:MM, e.g., 12:00
Accommodation	DepartureDate	Check-out date	Format: DD.MM.YYYY, e.g., 16.12.2017
Accommodation	DepartureTime	Hotel check-out time	Format: HH:MM, e.g., 12:00

Accommodation	NumberOfNights	Number of nights	From 0
Accommodation	NumberOfRooms	Number of rooms in the order	From 1
Accommodation	NumberOfGuests	Number of guests	From 1 to 4
Accommodation	AdditionalInfo	Additional order information	
Accommodation	RoomPriceTotal	Order amount calculation condition	"0" Multiplication of RoomPrice="*" (room price per night) by NumberOfNights="" (number of nights) is required. "1" Multiplication of RoomPrice="*" by NumberOfNights="" is not required.
Accommodation	SupplierInfo	Supplier information for the order	
Accommodation	ConfirmationNumber	Booking number	

Accommodation	Price	Stay price	Stay price depending on the number of guests specified in the search
Accommodation	Price	Room cost	From 0
Accommodation	TravelAgency Commission	Order commission	From 0
Accommodation	Penalty	Actual penalty amount	From 0
Accommodation	Note	Penalty comments	
Accommodation	DeadlineDate	Date of penalty sanctions	Format: DD.MM.YYYY, e.g., 15.12.2017
Accommodation	PossiblePenaltySize	Possible penalty amount	From 0
ToBeCancelled	Code	Cancellation possibility code	1 - cancellation possible 2 - cancellation not possible
ToBeCancelled	Name	Cancellation possibility name	Yes, No
ToBeChanged	Code	Modification possibility code	1 - modifications possible 2 - modifications not possible

ToBeChanged	Name	Modification possibility name	Yes, No
Hotel	Code	Hotel code	From 0
Hotel	Vat	VAT	1 - hotel works with VAT, 0 - hotel works without VAT
Hotel	Name	Hotel name	Academic
Hotel	Timezone	Timezone	Format: UTC+hour, e.g., UTC+3
Country	Code	Country code	From the CountryList method
Country	Name	Country name	From the CountryList method

City	Code	City code	From the CityList method
City	Name	City name	From the CityList method
Status	Code	Status code	From 0
Status	Name	Status name	Example: Confirmed, Booked, etc.
AmendmentRejected	Code	Not processed	

AmendmentRejected	Name		
AllowCancel	Code	Order cancellation possibility	1 - yes, 2 - no
AllowCancel	Name		
AllowModify	Code	Order modification possibility	1 - yes, 2 - no
AllowModify	Name		
Product	Code	Room code	From 0
Product	RoomName	Room category name	Category name in the selected language
Product	RateID	Tariff ID in the AandA system	From 1 to 168
Product	RateName	Tariff ID	Example: "Main"
Product	RateDescription	Tariff description	Example: "Main breakfast buffet"
Allotment	Code	Number of rooms available for booking	
Allotment	Name	-	-

Meal	Code	Indicates whether meals are included in the room price	0 - not included, 1 - included, 2 - included for an additional fee
Meal	Name	Name of the meal inclusion indicator	
Person	Id	Guest code	From 0
Person	LastName	Guest's last name	
Person	FirstName	Guest's first name	

NewsList	News	Important hotel news (if the tag is absent, there is no news for this hotel)	No hot water
NewsList	NewsTitle	News title	Lack of hot water
NewsList	NewsBegin	News start date	NewsBegin="2020-02-27" NewsEnd="2021-02-01"
NewsList	NewsEnd	News end date	
NewsList	NewsInfo	Full news text	In the hotel "TEST" there is no hot water

Service	ServiceName	Service name	Air ticket
Service	StartDate	Service start date	
Service	EndDate	Service end date	
Service	InvoiceId	Invoice number	From 0
Service	PersonId	Guest code	From 0
GroupInfo	GroupQtyFrom	Number of people/rooms corresponding to group booking	
GroupInfo	GroupType	Filling options	1 - people 2 - rooms
GroupInfo	GroupName	Type name	Filling options: Person or rooms.
GroupInfo	GroupNote	Group note	Sale on request
GroupInfo	GroupRule	Group booking rules	Cancellation terms and penalty amounts in case of group cancellation/modifications will be communicated separately

5.22. OrderListRequest

This method returns a list of orders.

To retrieve data, the method RequestName=OrderListRequest is used.

Input Parameters:

Parameter	Parameter Description	Note
BuyerId	Company code	Mandatory parameter
UserId	User code	Mandatory parameter
Password	Password	Mandatory parameter
Language	Output language	Optional parameter. "ru" – Russian (default), "en" – English.
LastName	Guest's last name in created orders	Optional parameter. When specified, orders are filtered by the specified last name.
Limit	Number of orders to display	Optional parameter. If not specified, 100 orders are displayed.
Mode	Has the value "XML"	Optional parameter. When specified, only orders created in XML are displayed. Without this parameter, all orders are shown.

ArrivalDateFrom	Start of check-in date range	Optional parameters. When specified, orders with check-in dates within the specified range are displayed.
ArrivalDateTo	End of check-in date range	Optional parameters. When specified, orders with check-out dates within the specified range are displayed.
DepartureDateFrom	Start of check-out date range	Optional parameters. When specified, orders with check-out dates within the specified range are displayed.
DepartureDateTo	End of check-out date range	Optional parameters. When specified, orders with order creation dates within the specified range are displayed.
RegistrationDateFrom	Start of order creation date range	Optional parameters. When specified, orders with order modification dates within the specified range are displayed.
RegistrationDateTo	End of order creation date range	Optional parameters. When specified, orders with order modification dates within the specified range are displayed.
ChangeDateFrom	Start of order modification date range	Optional parameters. When specified, orders with order modification dates

		within the specified range are displayed.
ChangeDateTo	End of order modification date range	Optional parameters. When specified, orders with order modification dates within the specified range are displayed.

Tag	Attribute	Attribute Description	Possible Values
IsThatAll	Code	-	1
IsThatAll	Name	-	Yes
Order	Id	Category code	From 1 to 20
Order	ReferenceNumber	Internal order number from the customer's system	From 0
Order	RegistrationDate	Order creation date	Format: DD.MM.YYYY, e.g., 15.12.2017
Order	DeadlineDate	Date of penalty sanctions	Format: DD.MM.YYYY, e.g., 15.12.2017
Order	Price	Total order cost	From 0

Order	TravelAgencyCommission	Order commission	From 0
Order	Penalty	Order penalty amount	From 0
Order	StartDate	Check-in date	Format: DD.MM.YYYY, e.g., 15.12.2017
Order	EndDate	Check-out date	Format: DD.MM.YYYY, e.g., 16.12.2017
Currency	Code	Currency code	From the CurrencyList method
Currency	Name	Currency name	From the CurrencyList method
Status	Code	Order status code	65
Status	Name	Order status name	Booked
ContactPerson	Name	Client's contact person for the order	
ContactPerson	Phone	Phone number of the client's contact person for the order	

ContactPerson	Fax	Fax of the client's contact person for the order	
ContactPerson	Email	Email of the client's contact person for the order	

This method returns a list of messages for an order. To retrieve data, the method RequestName=OrderMessagesRequest is used.

Input Parameters:

Parameter	Parameter Description	Note
CompanyId	Company code	Mandatory parameter
UserId	User code	Mandatory parameter
Password	Password	Mandatory parameter
Language	Output language	Optional parameter. "ru" – Russian (default), "en" – English.
Order Id	Order number	Mandatory parameter

Output Data:

Parameter	Parameter Description	Possible Values
message id	Message code	From 0
created	Message creation date and time	Example: 2017-06-07 18:02:45
from	Message author	Full name
message	Message text	Text

This method sends a message to an order. To retrieve data, the method RequestName=SendOrderMessageRequest is used.

Input Parameters:

Parameter	Parameter Description	Note
BuyerId	Company code	Mandatory parameter
UserId	User code	Mandatory parameter
Password	Password	Mandatory parameter
Language	Output language	Optional parameter. "ru" – Russian (default), "en" – English.
Order Id	Order number	Mandatory parameter
Message	Message to send	Mandatory parameter

Output Data:

Parameter	Parameter Description	Possible Values
-----------	-----------------------	-----------------

Message ID	Message code	From 0
------------	--------------	--------

5.25. CityTypeRequest

This method returns a list of city types (settlements). To retrieve data, the method RequestName=CityTypeRequest is used.

Input Parameters:

Parameter	Parameter Description	Note
-----------	-----------------------	------

CompanyId	Company code	Mandatory parameter
-----------	--------------	---------------------

UserId	User code	Mandatory parameter
--------	-----------	---------------------

Password	Password	Mandatory parameter
----------	----------	---------------------

Language	Output language	Optional parameter. "ru" – Russian (default), "en" – English.
----------	-----------------	---

Output Data:

Attribute	Attribute Description	Possible Values
CityType RequestDurationS	Request execution time	From 0
RoomAmenity Code	City type code	3
RoomAmenity Name	City type name	Settlement

6. Directories

6.1. Hotel Type and Rating Directories

This directory can be retrieved using the `HotelTypeRequest` method.

Hotel Types:

Rating Code	Rating Name (ru)	Rating Name (en)
4	Hostel	Hostel
5	Hotel	Hotel
6	Mini-hotel	Mini-hotel
7	Apart-hotel	Apart-hotel
8	Apartments	Apartments
9	Health resort	Health resort
10	Villa	Villa
11	Guest home	Guest home
12	Boutique hotel	Boutique hotel

13	Recreation center	Recreation center
14	Holiday hotel	Holiday hotel

This directory can be retrieved using the HotelStarsRequest method.

Hotel Ratings:

Stars Code	Stars Name (ru)	Stars Name (en)
------------	--------------------	--------------------

1	5 stars	5 stars
---	---------	---------

2	4 stars	4 stars
---	---------	---------

3	3 stars	3 stars
---	---------	---------

4	2 stars	2 stars
---	---------	---------

5	1 star	1 star
---	--------	--------

6	Without stars	Without stars
---	---------------	---------------

7	Uncertified hotel	Uncertified hotel
---	----------------------	----------------------

6.2. Order Client Status Directory

This directory can be retrieved using the ClientStatusRequest method.

Status Code	Status	Explanation
11	Request received	The order has just been created and received by the A&A manager.
18	In work	The A&A agent has started working with the order.
20	Application at the hotel	A booking request has been sent to the hotel.
21	Awaiting agent confirmation	The price and booking conditions have been offered to the agent, and the A&A manager is waiting for the agent's (client's) confirmation/cancellation.
22	Reservation restored due to refusal to change	A private status, rarely used for some clients. The reservation is restored because of refusal for changes.
25	Refused	The order cannot be fulfilled (no rooms/agent refused the service before confirmation).
35	Confirmed	The hotel has confirmed the booking, but the order documents have not yet been issued.

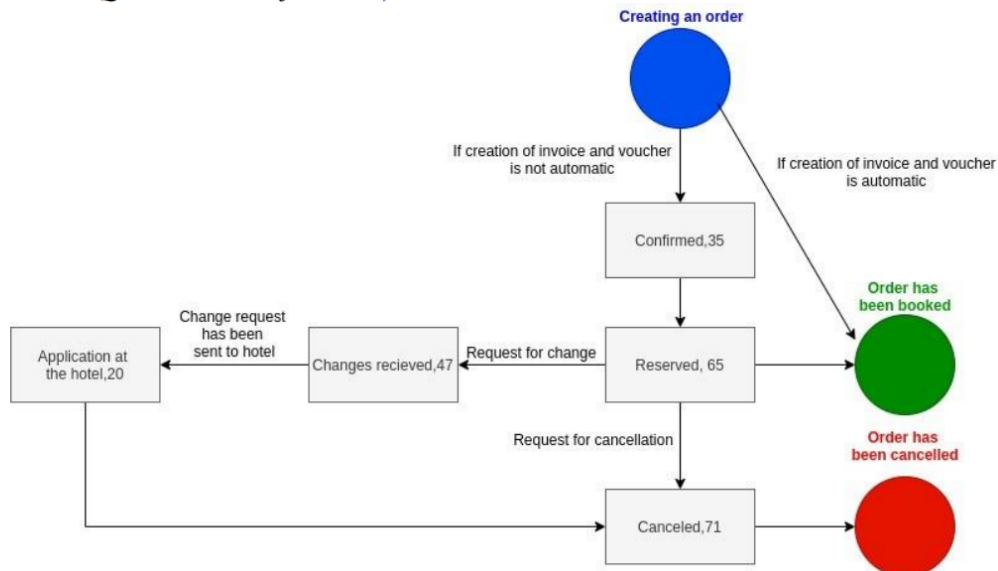

Status Code	Status	Explanation
47	Changes received	The order changes have been received by the A&A manager.
65	Reserved	All order services have been booked, and confirmation and invoices have been issued in the order.
71	Canceled	The order has been canceled.

7. Order Client Status Diagrams

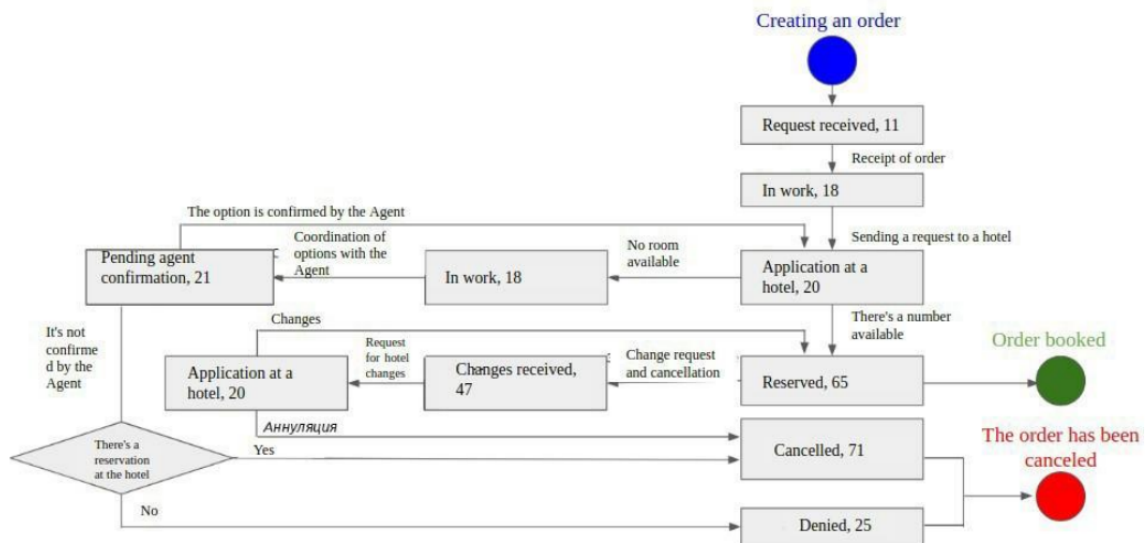

7.1. Quota Room (Free Sale / Free-Sale)

7. Charts of client order statuses

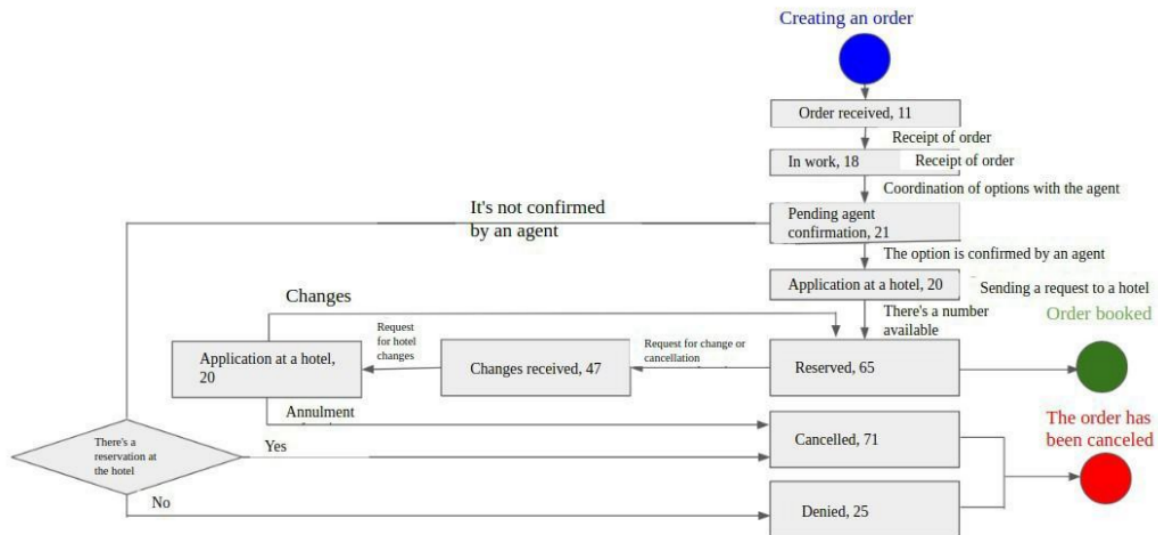

7.1. Quota number (free-sale)

7.2. Availability on request

7.3. Availability and prices on request

8. Error Codes

Error Code	Type	Description	Request
1	Authorization error	Check the correctness of the authorization data.	All methods
2	Country selection error	Enter an active country code.	CityListRequest
3	City selection error	Enter an active city code.	HotelListRequest, HotelSearchRequest
4	Stay deadlines error	Check the correctness of the dates and/or check-in/check-out times.	OrderRequest, HotelPricingRequest, HotelSearchRequest

5	Number of guests error	The number of guests does not match the NumberOfGuests parameter.	OrderRequest
6	Hotel room selection error	The room category does not belong to the hotel or is inactive.	OrderRequest, HotelPricingRequest
7	Order cancellation/changing error	The order client status code is not 25, 65, 18, 21.	OrderRequest
8	Order processing error	You cannot work with a non-existent order.	OrderRequest, OrderInfo
9	Hotel selection error	Select a valid hotel.	HotelDescriptionRequest, HotelPricingRequest, OrderRequest
10	Coordinates or search radius error	Check the format of the entered coordinates or search radius.	HotelSearchRequest

1	Language error	Check the "language" parameter. "ru" – Russian, "en" – English, empty parameter – default Russian.	CountryListRequest, CityListRequest, HotelListRequest, MealTypeRequest, MealCategoryRequest, ServiceTypeRequest, CityTypeRequest, HotelTypeRequest, HotelStarsRequest, HotelAmenitiesRequest, RoomAmenitiesRequest,
---	----------------	--	---

**HotelDescriptionRequest,
HotelPricingRequest, OrderListRequest**

1	Price	Check the format of the	HotelSearchRequest
2	border	PriceFrom and PriceTo	
	error	parameters. Only numbers are allowed.	
1	Order	The parameter value is not 0,	OrderRequest
3	cancellati	1, or 2.	
	on/changi		
	ng format		
	error		
1	Extra meal	The Meal Code parameter	OrderRequest
4	error	value is not 1 or 2.	
1	Order limit	Check the format of the Limit	OrderListRequest
5	format	parameter.	
	error		

9. Method Request and Response Examples

9.1. CountryListRequest

Request:

php

```
<?php

function getUrl($url, $post = "") {

    $ch = curl_init();

    curl_setopt($ch, CURLOPT_URL, $url);

    curl_setopt($ch, CURLOPT_RETURNTRANSFER, 1);

    curl_setopt($ch, CURLOPT_POST, 1);

    curl_setopt($ch, CURLOPT_POSTFIELDS, $post);

    $s = curl_exec($ch);

    curl_close($ch);

    return $s;
}

$post =
"RequestName=CountryListRequest&BuyerId=*****&UserId=*****&Password=***
*****&Language=ru";

$s = getUrl("https://go-api.aanda.ru/", $post);

header("Content-Type: text/xml; charset=UTF-8");

echo $s;

?>
```

For Console:

xml

```
<CountryListRequest

    BuyerId="*****"

    UserId="*****"

    Password="*****"
```

```
Language="ru"
```

```
/>
```

Response:

```
xml
```

```
<?xml version="1.0" encoding="UTF-8"?>

<CountryList RequestDurationS="0.003065">

    <Success/>

</OrderAutoUpdateResponse>

```

Response Fields:

- OrderAutoUpdateResponse
 - OperationType="calculate" — Matches the request's operation type.
 - OperationCompleted="true" — Operation status (false = not fully executed).
- Diff — Shows the difference between old and new order states.
 - Completed="true" — Whether the difference was calculated.
 - Changed="true" — Whether changes exist.
 - Available="false" — Whether instant confirmation is available.
- Summ — Shows financial changes.
 - Before — Previous state.
 - After — New state.
 - Penalty — Cancellation fee.
 - Meals — Meals cost.
 - Checkin — Early check-in fee.
 - Checkout — Late check-out fee.
 - Reservation — First-night booking cost.
 - Accommodation — Stay cost.
 - Total — Total amount.
 - Discount — Commission/discount.
 - ClientDiscount — Client commission.
- (For Aeroclub/Smartway requests, ValueRR (Rack Rate) is included. Smartway also adds ValueAgr (contract price).
- Items — List of changes (matches the request's Changes).
 - Item — A single change.
 - Completed, Changed, Available — Status flags.
 - ChangeSummary — Universal list of changes.
 - Changeltem — A single change.
 - Type — Change, Remove, or Add.
 - GroupName — Change category (e.g., "Room").
 - Name — Parameter name.
 - Before / After — Old/new values.
 - Before — Previous accommodation state.
 - After — New accommodation state.

Date	Method	Changes in XML-2
07.2017	HotelPricingRequest	Added TravelAgencyMealCommission parameter showing commission for additional meals
